

2 Post-Doc positions available on polymer chemistry at the University of Houston

Two postdoctoral positions are now available at the [University of Houston's](#) Center of Excellence in Polymer Chemistry in the lab of [Eva Harth](#). The ideal time-frame for this position is a minimum of two years (three years max). The newly established Center of Excellence is seeking competitive applicants with a strong background in synthetic polymer chemistry in areas that include either fundamental polymer synthesis, polymer network chemistry, sustainable materials or nano-biomaterials. Applicants must have excellent communication and writing skills for this position and be fully committed to the field of Polymer Chemistry. Applicants are also expected to work collaboratively with a team, possess high levels of social and emotional maturity, and act as mentors in the field of Polymer Chemistry. Applicants must have already finished and corrected thesis/papers with previous advisor. In order to apply please submit three letters of recommendation, an up-to-date CV, and a one-page statement of interest. Please send all materials or any questions to harth@uh.edu. Applications will be accepted until the positions are filled.
